

Performance Report

This Performance Report contains information on the performance of this registered housing agency for the 2022-23 Financial Year. Included in this report are results against key performance measures (KPMs) with a comparison of the average results from similar registered housing agencies. This information is published on the 'Register of Housing Agencies' (the Public Register) for each financial year from 2019-20 onwards.

The Housing Registrar annually assesses registered agencies under the *Housing Act 1983* (Vic) and gazetted Performance Standards. As part of this process, KPM results for each financial year are collected and published in this report. Separately, the Housing Registrar publicly reports on the compliance outcomes against Performance Standards for each registered agency and any regulatory intervention by the Housing Registrar exercised under Division 8 of the Housing Act. This information is also available on the Public Register.

KPMs are quantitative measures that help to demonstrate registered agency performance against certain aspects of the Performance Standards. The Housing Registrar recognises that registered agencies deliver a wide range of services and outcomes that may not be suitable for quantitative analysis. The Housing Registrar therefore considers multiple factors when monitoring the performance of registered agencies and does not make regulatory decisions on KPM results alone.

KPMs provide valuable information about registered agency performance and insight into tenant experiences. The Housing Registrar acknowledges that there may be factors outside of a registered agency's control that impact on some of these measures and will consider these factors when assessing a registered agency's performance against KPMs.
